# Engineering Excellence

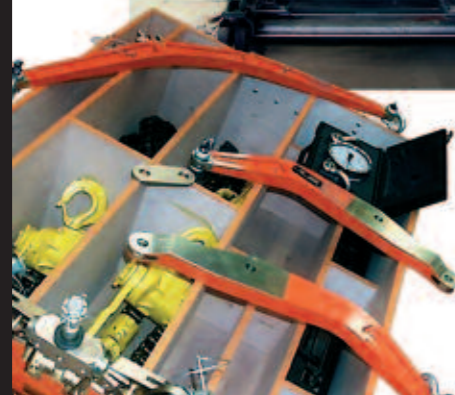

supporting international airlines

**Trac Aero Service Ltd (TAS), part of the Trac Group of companies, has fast earned the reputation as the global premier one-stop-shop ground support equipment and tooling organisation.**

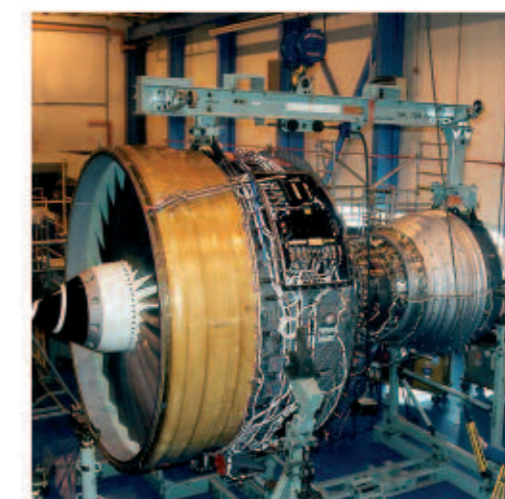

From our purpose-built facility in the UK, TAS has developed engineering solutions that take the problems out of maintenance, repair and overhaul. We have extensive experience in the design and manufacturing of all types of ground support equipment/tooling, as well as offering a first class overhaul service to our many airlines and maintenance, repair and overhaul customers.

Our first rate customer support extends to maintenance and servicing of customers' existing equipment, from engine stands, engine change kits, bootstrap kits, APU equipment, as well as calibration and proof load testing requirements.

We have a considerable amount of aircraft and engine ground support equipment/tooling items now in stock, held at our facility in Derby, all fully certified and available for immediate loan, lease or sale. This portfolio ranges from engine stands, bootstrap kits, landing gear equipment, axle jacks, tripod jacks, wheel and brake change, APU equipment, plus many items of maintenance and service tooling.

Only by understanding our customer requirements are we able to set and achieve our business and technical goals to ensure continued success.

## The Trac Group

Our commitment to quality is absolute and is a feature of the goods and services we provide. Operating a comprehensive quality management system throughout the group all sites are ISO 9001 accredited and adopt best practice in all disciplines. Our strategic policy of continuous improvement enables us to deliver value for money solutions to the most complex industrial applications.
