# Engineering Excellence

complete machining solutions for industry

**Design and Manufacture of Precision Fixtures, Gauges, Special Purpose Tooling & The Manufacture of Components.**

**From its foundations in the early sixties, Trac Heaton has grown to become one of the strongest players in the field of Precision engineering. Serving many national and international blue chip clients, we offer a service that is unrivalled.**

During over four decades of trading, valuable expertise has been developed in traditional skills and new technology, particularly in the fields of Aerospace, defence, power generation and Medical. Combined with a policy of diversification, we ensure that our clients can benefit from a broad and highly specialised service. From your initial enquiry, we can design and manufacture jigs, tools, fixtures, gauges, and special purpose machines to your exacting standards, and machine components to customers specifications.

#### **Dedicated Service**

Our one stop shop approach will fulfil all your requirements from start to finish. Here at Trac Heaton, we have a team of dedicated personnel to advise and support you along every step of the way. We can work from your drawings, or our design team can construct non-standard items through CAD using the latest software or through conventional drafting.

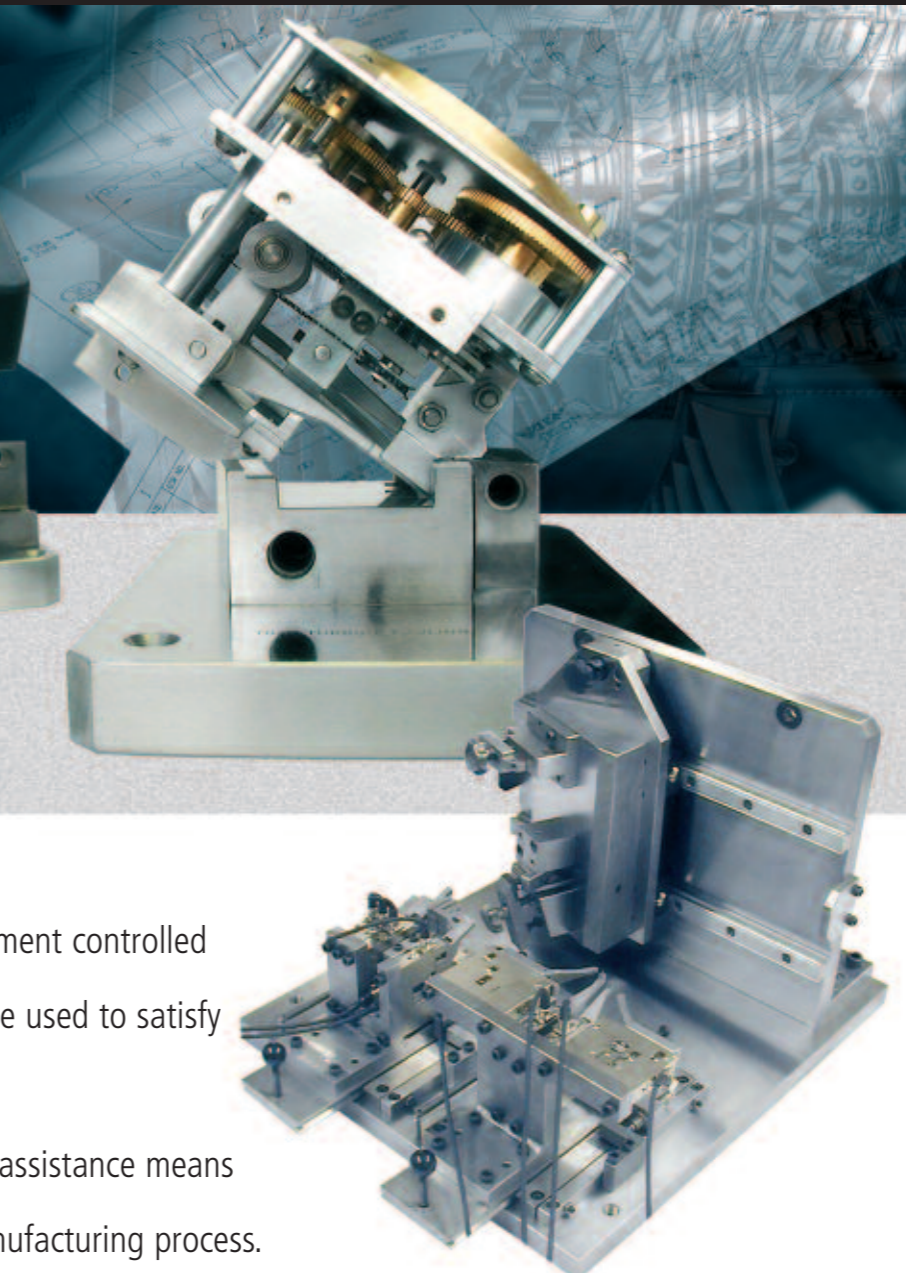

Precise machining and environment controlled calibrated inspection equipment are used to satisfy our customers' most exacting standards.

Our commitment to quality and technical assistance means that checks are made throughout the manufacturing process. All polices and procedures are defined and documented so that they are implemented and maintained at all levels. We also believe it is important to offer our clients a full after-sales service for the products we supply.

#### **Our Capabilities**

Using a range of materials from mild steels to nimonic, we specialise in machining items up to 2.5 cubic metres. However we firmly believe that it is important to remain flexible beyond that capacity. We aim to continually upgrade our equipment and train our staff to produce finer and better products, to ensure we can offer you the best possible product and service at all times.

**Accreditation**  
AS9100, No FM10757  
Rolls Royce, No 89130 & 11480  
BNFL, No 460006003  
BS EN ISO 9001:2000, No FM00968

## The Trac Group

Our commitment to quality is absolute and is a feature of the goods and services we provide. Operating a comprehensive quality management system throughout the group all sites are ISO 9000 accredited and adopt best practice in all disciplines. Our strategic policy of continuous improvement enables us to deliver value for money solutions to the most complex industrial applications.
